

M5 Junction 25 Improvements Scheme Project Newsletter: February 2020

Project Update

Toneway

We have recently completed excavation work to widen the existing carriageway and completed all kerbing works on the verge side.

80% of the drainage in the area has been installed with the remainder due to be completed this week. Sub-base has been laid in preparation for the surface course.

Street lighting, signs and ducting works will begin in the verge on the week commencing the 17th February with the temporary barrier being removed on the 20th February.

Link Road

All concrete works are completed on the North and South Abutments, including the Otter Shelf.

Over the next few days, we will be filling in holes and tidying up any blemishes to the finished concrete of the abutments.

The scaffolding for the placement of the pre-cast beams has been delivered and the bearing pads for the bridge beams are now due to be fixed onto the abutment bearing shelves.

M5 Junction 25 Improvement Scheme – February 2020 – Continued

Henlade Culvert

A significant milestone for the project has been achieved with the installation of the 36m long Henlade Culvert.

This culvert will divert the existing Henlade Stream to allow construction of the new Nexus 25 roundabout. The culvert is being installed in 17 sections over a period of three days.

Road Closure

On Tuesday 18th, Wednesday 19th and Thursday 20th of February, the Toneway will be closed for night work between the hours of 20:00 and 06:00.

The closure will enable us to install the final traffic management phase of the Toneway works, to enable the reinstatement on the central reservation.

Public Information Centre

If you have any questions about our work please come along to our weekly Public Information Centre, which is based in the Gateway Park & Ride from 14:00-15:00 every Wednesday and Thursday and 13:00-15:00 every Tuesday.
